

## THE WORLD OVER

### UNEMPLOYMENT INSURANCE

With the great unemployment in the world today and the general falling off of work there seems to be a great need of some kind of unemployment insurance in order to keep the world populace from starving, or being kept by the more fortunate citizen who has saved enough for a rainy day. Last year it was stated that one person in every twenty-eight in the world was deprived of a means of making a livelihood, and this year's figures, when computed, will not show much improvement. This means that between 20,000,000 to 25,000,000 people were without the means to support themselves last year, and that in order to give them a decent living the rest of the world would have to pay in taxes and other means about four per cent of their total income. In other words an additional four per cent income tax would be necessary to provide for the unemployed of the nation, and no doubt this sum would provide a considerable surplus if unemployment insurance were in force and the man who was working had to pay his share of the tax in order to provide for the time that he was without work. Many argue that the unemployment insurance (which is the sole in the Old Country with modified clauses) is not the proper thing and that it naves a man lazy and unwilling to work. This may be so in some cases, but the majority of the people are willing to work for all they get and should a general unemployment insurance scheme be in force, after a few years under normal conditions, there would be an accumulated fund almost sufficient to carry the unemployed in times like the present. In this way the working class would be forced to provide for a rainy day and the more fortunate would be taxed less under such a scheme than under the present system, when those who have the means of making a living are paying wholly for the ones that are down and out. Unemployment insurance on the same basis as the Compensation insurance scheme, would be almost certain to be a solution to the unemployment question. Some day, maybe, our legislators will get down to brass tacks and provide for these years of depression. It would be sound business principles to do so.

Wheat may be breaking the soil in many parts of Alberta, but James Perry's sample of Marquis spring wheat, seeded half a mile north of Lethbridge on April 4th, is believed to hold the southern record. Perry displayed wheat measuring three inches above the ground. Just a sample of 320 acres he seeded just before the storm.

## OUR SOUTHERN NEWS ITEMS

Mr. and Mrs. Henry Forsch of Calgary came out on Tuesday of last week and were visiting with Mr. and Mrs. John Forsch. Mr. Forsch returned to his home on Monday, while Mrs. Forsch will spend about two weeks visiting in the district with her daughters.

Born, to Mr. and Mrs. J.J. Ohlhauser

## CALGARY KNITTING COMPANY

## FARMERS ON LAND AGAIN

After the heavy rains of ten days ago, the farmers can be seen almost everywhere on the land, busy getting in the spring seed. Intermittent rains may delay seeding somewhat, as the weather does not seem to be cleared as yet.

## DATES SET FOR GOLF PLAY-OFFS

The secretary of the Carbon Golf Club received word the first of the week regarding the arrangements that have been made this year for the running off of the play-offs of the Alberta Country Districts Golf Association, which is sponsored by the Calgary Daily Herald.

Many changes have been made this year in the manner in which these play-offs are to be run. The sixteen Districts will be grouped into sub-districts of four districts and the winners of these four sub-districts will go to Calgary to compete in the play-offs for the Championship. This means that the local play-offs in District 15 will be conducted as formerly, but the winner instead of going to Calgary to compete with the winners of the other sixteen districts, he will play at some central point with the winners of the other districts in the sub-district, and in our case at Carbon, the sub-District chosen has been made up of Districts 4, 14, 15 and 16. As it so happens the central point for the play-offs of this sub-district has been chosen as Calgary, so the winner will go to the City as formerly, as the guest of the Calgary Herald.

The following is a complete list of the grouped districts, and the point at which sectional play-offs will be held:

Districts 1, 2 and 3—winners to play at Lethbridge.

Districts 4, 14, 15 and 16—winners to play off at Calgary.

Districts 7, 8 and 12—winners to play off at Lacombe.

Districts 5 and 11—winners to play off at Medicine Hat.

Districts 10 and 16—winners to arrange to play off at one of the above sectional play-off points.

The play-offs of District 15, which comprises the clubs of Carbon, Irricana, Trochu and Strathmore, will be held the same as in former years, and these games will commence on May 29th, when the first series will be played over the Carbon course. The others will be at Irricana on June 5th; Trochu June 19th, and Strathmore June 26th.

on Friday, April 29, a son.

Mr. Vern Dresser shipped a car load of cattle to Calgary on Wednesday of this week.

Mr. H. G. Kary and Mr. G. Ohlhauser made a trip to Calgary on Monday of this week.

Mr. and Mrs. Sam Ohlhauser went to Swallow on Saturday.

Word was received on Thursday last of the death of Mrs. B. Hein of Coronation, at the Hanna Hospital on April 28th. Mrs. Hein was a sister of Mrs. Walter Birtles and to Hilda and Ida Kary of Carbon, and to Mrs. Sigmund and Albert Kary, of Redlands, who all went over to attend the funeral services on Sunday. Rev. A. Irtman and Chris. Bertsch also made the trip, the funeral service being conducted by Rev. Irtman.

Mr. and Mrs. E. J. Bertsch and Mr. J.J. Bertsch were visiting with relatives at Trochu on Sunday.

Mr. and Mrs. J. J. Bertsch went into Calgary on Wednesday of last week. Mr. Bertsch returned on Thursday and Mrs. Bertsch will spend a couple of weeks in Calgary with her daughter, Mrs. Isaac Zacharias.

Farmers are on the land again and wheat seeding in the district is about 90 per cent completed.

Mr. J. J. Bertsch and E. J. Bertsch made a trip to Drumheller on Tuesday.

## ALBERTA NEWS

A gang of forty men are at work on the telephone lines near Namaka.

A fire broke out in the Trochu flour mill last Sunday night, damaging the machinery considerably.

Under the heavy blanket of snow which covered the district, wheat is steadily growing, and a green carpet an inch nap is revealed now that the snow has disappeared.

With an anticipated enrolment of 1,000 against 850 last year, the peak to date, the 20th annual joint summer school session of the Department of Education and University of Alberta will open on July 4th.

The danger to upland game birds by reason of the recent storm is reported to be less than first feared. Hungarian partridge, and pheasants grouse and prairie chicken had a miserable week, but observers state they will come through pretty well.—Didsbury Pioneer.

Every province in Canada is now active in preparing for the sowing of good seed this spring having in view the growing of samples for entry in some 66 classes of the World's Grain Show at Regina, Canada.

"It's very hard to drive a bargain," said the fellow who had bought an old Ford for ten dollars.

The Government of Alberta saved \$500,000 through banning use of certain highways owing to recent heavy snowfall and rains, stated Premier J. E. Brownlee recently.

Publishers of the Lacombe Globe were remanded for trial by Magistrate Scott of Red Deer recently, following a preliminary hearing of a libel suit brought against them by Mr. J.J. Maloney, public speaker of Edmonton.

Damage to roads, phone and telegraph lines by the recent storm is estimated to run over \$1,000,000 in Alberta. The telegraph department of the Canadian Pacific Railway alone estimates their loss will run to at least \$35,000.

Production of the sugar factory at Raymond was just about half of the total sugar consumption in the province last year, and their plant is now being remodelled to increase production.

The recent snowfall at Olds caused some damage to the curling rink of that town, the heavy weight of the snow proving too great for the supports.

## INTERNATIONAL HARVESTER MAKES REDUCTIONS

This week the International Harvester agent at Carbon, Fred Poxon, announces that his company has made a general reduction in prices under the following plan:

On 40 per cent of the price of new machinery a wheat adjustment will be made, this adjustment paying 77c per bushel for wheat.

A discount of 5 per cent is allowed for cash.

A discount of 5 per cent is allowed on a note at payment time in fall after wheat adjustment is subtracted from note and interest added to note, providing cash and first note represents 50 per cent of the price of machine.

## Long Years Ago

(Gleaned from the Files of the Carbon News eleven years ago this month)

A pretty wedding was solemnized at the Presbyterian Church last week when W. H. Levins of Carbon and Mrs.

## CARD OF THANKS

We wish to convey to our friends and neighbors our sincerest thanks for the many acts of kindness shown us during the illness and sad bereavement in the loss of our dear husband and father, the late John Boyce

Mrs. J. Boyce and Family

## COUNCIL CUTS 2½ MILLS OFF VILLAGE TAXES

At the meeting of the Council of the Village of Carbon, held on Monday evening of this week, mill rates occupied most of the council's time. After fully going into the question of tax payments and expenditures it was decided to reduce the Village mill rate from 16 to 15 mills, and to reduce the Supplementary rate from 4 mills to 2½ mills, making a total reduction of 2½ mills on Village taxes.

The school board has not set the mill rate for school taxes, but in all probability, this rate will remain the same as last year.

Taxes are high enough in the Village, but tax payers are reminded that unless tax arrears are paid that the rate cannot be reduced, so every one ought to make effort to pay their 1932 levy at least and at the same time try to clear off some arrears. A good plan would be for the individual who is in arrears, to budget such arrears and try to pay so much each year, besides the current levy. In this way it would not be many years before all tax arrears would be paid and our mill rate could be reduced.

F. Cave were united in marriage by the Rev. D. F. Robertson.

Mr. Pete Turcotte was rushed to the hospital on Monday morning to undergo an operation for appendicitis.

A son was born to Mr. and Mrs. John Brost.

C. Langlois of Rosebud was badly hurt last week when he was thrown from his horse.

Dr. A.C. Johnstone has opened an office in Carbon.

## BONUS ON COAL USED FOR COKE

To encourage the greater use of Canadian coal in the manufacture of coke or gas the Dominion Government will pay any difference between the cost of United States and Canadian coal up to \$1.00 per ton. Official announcement to this effect was made on Monday of this week. The assistance will be effective as from April 1, last.

The text of an Order-in-Council authorizing this action reads in part: "The committee of the Privy Council, on recommendation of the Minister of Mines, advise, in order to encourage the greater use of Canadian coal in the manufacture of coke or gas:

"(1) that in respect of coal mined in Canada during the period fixed by this Order-in-Council (which is three years) the Minister of Mines, through the Dominion Fuel Board, be authorized to pay the coal operators, from such sums as may be provided by parliament for the purpose, the difference in amount per net ton between the laid down cost to the coke oven proprietor or gas manufacturer, of coal mined in Canada and that the laid down cost at the same plant of imported fuel that would otherwise be used, up to a maximum of \$1.00 per ton.

"(2) That payments to coal operators shall be made only upon that quantity of Canadian coal used in the manufacture of coke and gas at the plant in excess of the average quantity of such coal used annually in such plant during the three years immediately preceding the 31st day of December 1931. Provided that trial shipments of Canadian coal used in any plant for experimental purposes only shall not be included in computing the amount of Canadian coal used in any plant for the purposes of this section."

## Carbon Chronicle Installs New Press

E. J. Rouleau, proprietor of The Chronicle, Carbon, Alberta, has installed a Wharfedale cylinder press in his printing office which he will use in getting out his paper and for the printing of posters of all kinds. Mr. Rouleau is one of those optimists who believes there is a bright future (which is not far off) for his town and district, and is now well prepared for any rush of work that may come his way. We wish him much prosperity with the installation of his new press.—Acme Sentinel.

## Balancing Life's Budget.

With the problem of balancing budgets occupying the minds of all people entrusted with the duties and responsibilities of government whether in the Federal, Provincial or municipal fields; with the same problem uppermost in the minds of the executives of all our large transportation systems, industrial enterprises and financial institutions; with every business man, big and little, every head of a family on salary or earning wages, even men and women out of employment, all engaged with the same problem, the thought intrudes itself: "Are people, individually and collectively, more concerned with the dollar-and-cents balancing of their material budgets than they are with the much more important balancing of their lives?"

It is important, of course, vitally necessary in fact, that people should balance their material budgets. If they do not, bankruptcy in business and financial disaster lies ahead. No individual, no corporation, no government, no nation, can go on indefinitely spending more money than they receive or have. Monetary budgets must be balanced; trade budgets must be balanced, that is, inasmuch as every import is likewise an export, and every export an import, these must balance, and if every nation insists on developing exports while refusing to receive imports, the world's economic structure is thrown out of balance and bankruptcy leading to disaster and ruin is inevitable.

But it is equally true, and a law of nature that cannot be ignored and dare not be defied without loss and suffering, that the budget of our very lives must be balanced. But inasmuch as disaster may not follow quite so quickly, and the payment of the penalty may be longer deferred, than is true in the financial world, most people neglect to properly balance their lives until it is too late.

In the struggle for material wealth, for success in business, for supremacy in political life, for victory in the field of sport, even to reach the top of the social ladder, what a vast number of people overlook and neglect the all-important asset of maintaining their physical health. Failing to do so, their lives are sadly out of balance, for of what avail is the accomplishment of their desires if the price to be paid is impairment in health, bodily vigor and strength undermined? Achievement at such a price is too costly, and is, in fact, not achievement at all, but failure, because one cannot enjoy or long retain that which has seemingly been achieved.

How frequently has it happened that a brilliant student aiming at high marks and scholastic honors through too close application to his or her studies, and the burning of the midnight oil, has so sapped both mental and physical strength that in the crowning hour of learning achieved, and apparently with a life of great promise just beginning, collapse has come.

Others in the race for material things utterly fail to balance the budget of their lives by any intellectual studies or pursuits. They fail to balance their lives with the beauties of nature, or music, or good literature. They even neglect the taking of proper exercise and recreation. As a result of their unbalanced lives they become gross, self-centred, utterly selfish, and largely lost to all the finer things of life.

Man is a dual personality—a combination of body and spirit. If his life's budget is to balance, he must devote attention both to his body and its needs and to the development of mind and spirit. He cannot afford to neglect either the one or the other; neglect of one means not only that it will suffer but the other will also suffer.

The balancing of life's budget calls for an all-round development of body and of spirit, and of the mind which is partly of the body and partly of the spirit. A man may scoff at religion, he may profess to have no religion, but in so doing he merely advertises the unbalanced character of his life. He is less than a complete man. A man may be perfect physically, but if he neglects his mind and his spirit, he is merely a high type of animal. On the other hand, one who neglects his body and develops his mental powers to the exclusion of all else, is a freak, and even his mental powers become distorted and unreliable because he lacks the necessary contact with and appreciation of natural human forces.

It is only through a true balancing of life's budget that man can possibly reach his highest destiny of happiness, achievement and usefulness in this world.

### Where Licenses Are High

Motor car taxes are high in Germany, the average payment made by German motorists being \$150. Great Britain's average is \$120, while in America it is as low as \$32, which includes also the petrol tax.

China has always been a silver-standard country, since it possesses only a negligible quantity of gold.

"What do they mean when they say Washington, D.C.?" asked the teacher.

"Washington de capital," piped up a little chap.

Copper near the surface of the ground is said to check growth of vegetation. For this reason aeroplanes are being used in Africa to spot likely deposits of copper.

## Would Train Nurses For Mental Hospital Work

Alberta Psychiatrist Speaks Of  
Success In Treating Mental  
Cases

Combined training courses for graduate nurses, which would include as well as general hospital work a considerable amount of mental training was suggested by Dr. N. Barager, Alberta psychiatrist, as one of the solutions to the present mental health problem at the recent session of the Alberta Association of Registered Nurses Convention.

The mental hospital nurse needs general training plus tact and good judgment to the 'nth degree, he declared.

Readjustment of the public viewpoint to the mental case, which is gradually taking place, is one of the greatest needs in dealing with the care of such patients, he said. It must be understood the patient is ill, as is the patient in the general hospital.

Dr. Barager spoke of the 25,000 patients in mental hospitals and 6,000 in mentally defective institutions in Canada. The age-old idea of an insane person entering the hospital and remaining behind closed doors for the remainder of his life is an untrue picture today. Sixty-one per cent. of the number admitted were discharged last year.

The day is not far distant when criminals will be treated as mentally ill persons and dealt with by psychological measures, the doctor believed.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence, who is infested with worms can take this preparation without a quail of the stomach, and will find in it a sure relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

## Plenty Of British Capital

Is Available In Canada For Sound  
Investment Purposes

Millions of dollars of British investment for the development of empire enterprises where fair returns can be shown for bonafide industrial projects, Major Gordon C. Home, official of the Empire Development Association, of London, England, stated at Victoria.

"There is plenty of capital in Great Britain, despite the difficult nature of times, looking for ordinary returns through investments in industrial and other undertakings, within the empire. Our great difficulty has been that worthwhile projects in the British dominions have not been drawn as closely to the attention of the motherland as might be desirable. One purpose of the Empire Development Association is to secure information of investment opportunities to lay before those having the capital to encourage and develop such undertakings," said Major Home.

Douglas' Egyptian Liniment is unrivalled for speedy relief in muscular rheumatism, lame back, inflammation, burns and felons.

## Garnet Wheat

Mixture As Much As Seven Per Cent.  
Allowed In No. 1 Northern

Since 1926 the grain inspection department has permitted as much as seven per cent. of Garnet wheat in No. 1 Northern. James D. Fraser, chief grain inspector, told the House of Commons Committee on Agriculture. That proportion would not affect the grade. In general, however, Garnet had been kept fairly well separated from other varieties.

Mr. Fraser had no opinion to offer as to whether Garnet should or should not be graded separately. In his experience he had never received any complaint against No. 1 Northern on account of Garnet being contained therein.

## Tax Duplication

Premier Brownlee, Of Alberta, De-  
plores Double Taxation System

Duplication of income taxes by federal and provincial governments was deplored by Premier John E. Brownlee, of Alberta, addressing the annual meeting of the Winnipeg Board of Trade. He said steps should be taken to revise the constitution of Canada to meet modern requirements and eliminate the duplication of taxation.

Appealing for confidence, clear thinking and sanity in the face of economic depression, Mr. Brownlee urged business men to co-operate with governments and farmers in the solution of the west's problems. The most pressing problem was that of agriculture. Some means must be found of enabling the farmer to overcome the burden of debts accumulated in the last two years.

Another problem was markets. Research in this field was needed. There were many untouched markets for western Canadian products. All should be sought out and explored.

The problem of governmental finance was also a serious one, but there could be no thought of inflation or public repudiation of debts. Mr. Brownlee criticized those who pressed for government economy at all costs. Saving in expenditure could only be pressed a certain distance, and after that it resulted in a curtailment of essential service.

## Churchill Development

Preparing Facilities For Both Inward  
and Outbound Cargoes

Construction of a freight shed for imports coming into western Canada by the Churchill route will be one of the features of work at the Bay port this year. Tenders for the shed will be let very soon, it is expected. Only about 250 men will be employed at Churchill by the Department of Railways and Canals instead of the 750 that were engaged last year. Dredging will be done by one dredge this summer, instead of the two that worked last year. The dredging programme will be completed this summer and will leave the harbor ready for the next twenty years, according to port authorities.

Construction of the extension to the conveyor system is underway now and will be completed about the middle of the summer. Only a small portion remains to be completed on the dock. Efforts are under way to obtain livestock facilities at Churchill for the summer, and equipment for unloading coal from inbound boats.

It Testifies For Itself --Dr. Thomas' Eucletic Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

## Cuts Electric Sign Cost

Large Economies Will Be Effectuated  
Through New Flashing Device

A new electrical flashing device, by means of which a wave of light is sent along a row of lamps without the need of any costly mechanically moving parts, is expected to effect large economies in railroad signalling systems, moving street signs, traffic lights and in other fields. It was demonstrated for the first time in public by William A. Gleusing of the General Electric Research Laboratories, before the Science Forum of the New York Electrical Society.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

## A Free Show

The fact that C. B. Cochran is putting on "The Miracle" again in London, England, again recalls a good story. Among those who were queuing up for the advance booking on the occasion of its last presentation were a Scot and a Jew. When it came to the Scot's turn he asked for twelve orchestra stalls and paid with a ten-pound note, which fact staggered the Jew. "Come along, sir," said the box-office man impatiently to the Jew, how many seats do you want for "The Miracle?" "None," he replied. "I've just seen it."

Bolivia is trying to arouse interest in gold mining.

## Death Toll Among Deer

Strange Malady Plays Havoc With  
Deer In Northern Saskatchewan

Reports that bear evidence of widespread death toll among the deer of Saskatchewan's northland, have been reaching here. Starvation, or some strange malady which may be a form of "sleeping sickness" is believed the cause of the animals' deaths.

Travellers from the Jack Pine lands of the Big River country tell of "scores" and "hundreds" of deer lying dead in the woods.

A game warden instructed by A. H. Etter, provincial game commissioner, to trace down the reports, tells that on one's day's journey while patrolling south of the Beaver River he came across the bodies of twelve deer. There was no apparent cause of death. The animals looked as if they had just laid down and died.

The lungs and liver of these deer were removed and have been sent to the veterinary pathologist at the University of Saskatchewan, who will examine the organs in an endeavor to determine the cause of death. The report is the first official one to be made, but the belief that the condition is general in the northland, is to be investigated as soon as weather conditions permit travel.

Norway has passed a law prohibiting smoking while driving an automobile.

London will have an ideal homes show this spring.

## CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust cloths going into discard;  
Unpleasant to use; a bother to  
Wash

APPLEFORD WONDER PAPER  
HAS GREAT VOGUE

Of all household tasks, that of dusting is the least appealing to the majority of women.

However, this condition, like many another connected with housework, is undergoing radical change. In a great many Canadian homes the women are discarding dust cloths entirely, and are using Appleford Wonder Paper instead, because it actually dusts—as it cleans—as it polishes, doing a better and much quicker job than the old dust cloth ever did.

This new, and extremely modern Wonder Paper, is made from clean rags, and soft paper pulp, treated in a scientific way with a hi-grade furniture polish; and absorbs dirt instead of spreading it.

Appleford Wonder Paper comes in handy-size packages, twenty-five large sheets for twenty-five cents. You crumple a sheet into a soft wad and go over the surfaces requiring attention. Then when one side is soiled or worn, turn the Wonder Paper inside out. After you have given a quick and lasting finish to furniture and woodwork, you can still use Wonder Paper on the floors, if you wish.

And when you are through, there's no old duster to shake out or wash. Throw the soiled Wonder Paper away and you've completed the most tiresome part of housework in half the time and with half the effort.

Wonder Paper is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box.

## Special Offer

Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If yours hasn't, we'll be pleased to supply you from the factory. Just fill in and mail this coupon.

## COMFORT for COLICKY BABIES ... THROUGH CASTORIA'S GENTLE REGULATION

The best way to prevent colic, doctors say, is to avoid gas in stomach and bowels by keeping the entire intestinal tract open, free from waste. But remember this: a tiny baby's tender little organs cannot stand harsh treatment. They must be gently urged. This is just the time Castoria can help most. Castoria, you know, is made specially for babies and children. It is a pure vegetable preparation, perfectly harmless. It contains no harsh drugs, no narcotics. For years it has helped mothers through trying times with colicky babies and children suffering with digestive upsets, colds and fever. Keep genuine Castoria on hand, with the name:

*Cast H. Fletcher*  
**CASTORIA**  
CHILDREN CRY FOR IT

## King George Refused Stamps For Collection

Royal Family Does Not Accept Gifts From Public

American admirers of George V. and his stamp collection, who have been sending His Majesty specimens of American issues, are advised through the Associated Press that he does not accept gifts of stamps. The Royal Family of Great Britain makes a practice of not accepting gifts from the public at home or abroad. What is more, with respect to proffered gifts of American stamps, George V.'s world famous collection includes only stamps of the British Empire. This explanation is timely. An American sent His Majesty specimens of a recent issue of commemorative stamps from this country and was peevish because they were not accepted. The story got into the newspapers and tended to convey the wholly erroneous idea that King George was unappreciative of the compliment paid him by the offer of the stamps. A statement of the Royal Family's practice in such matters should be sufficient to remove any such misunderstanding.—Detroit Free Press.

## DELIGHTFULLY BECOMING TO THE HEAVIER FIGURE IS SIMPLE STRAIGHT LINE DRESS

Here are charming lines for the matron. And into the bargain, it is a very simple dress to fashion.

The bodice is given a cross-closure effect, so slimming, through a neat inset vest, that scallops its outer edge. The skirt has two little plaits at either side of the center-front, creating a center panel to give the figure height and grace.

It can be made with short or long sleeves, just as you please about it. It's very smart in printed crepe silk with plain contrast.

There are many rayon novelties smart to fashion it for home wear. Sheer woollens are also suitable.

Style No. 942 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 4 1/2 yards of 35-inch material with 1/2 yard of 35-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## The Fanning Mill

Valuable Information Regarding Its  
Use and Operation

(By H. G. L. Strange)

Seed drill surveys that have been made by the Dominion Seed Branch show without a doubt that a vast amount of weed seeds and other impurities are seeded into the ground each year with seed grain. Investigation further shows that most of this grain had been cleaned through fanning mills. The reason for these impurities being present in the seed is unquestionably due to the fact that it is very difficult to clean grain properly with the average fanning mill.

Based on the experience of many years of cleaning Registered Seed to the high standard of perfection required by the Seeds Act, the writer has worked out a method of cleaning seed with a simple fanning mill that will be found to be simple and effective.

In the first place only two screens are really needed for a fanning mill—a top screen that will scalp off large grains, pieces of straw and parts of unthreshed heads, and a smaller screen underneath that will allow the weed seeds, small cracked grains, etc., to pass through, leaving on top of the bottom screen only the large plump kernels required for seed. A fanning mill, using two good screens as described, will do just as good work as will those fitted with banks of screens—perhaps better. Some of the large kernels, however, will be light, so that a strong air blast is necessary to blow them out. The mill should be turned at such a speed that will produce such a blast of air as will blow over at least 10 per cent. of the grain, then it is certain that all light kernels are being separated.

If a fanning mill would continue to operate in this manner no weed seeds or other impurities would be present in the final cleaned seed. Unfortunately the average fanning mill will not continue to work in this fashion for more than a few moments, the reason being that the screen, both top and bottom, particularly the bottom screen, very quickly plug up with small kernels, and so allow the weed seeds and impurities to pass over with the good grain.

Some fanning mills are fitted with devices that keep the screen clean, such as tapping hammers or travelling brushes. These devices, however, are very expensive and very few can afford them. A fanning mill without these extras can be made to do good work providing the operator will stop the machine at least every five minutes, remove the screens and carefully clean them with a stiff brush. If this is not done it is quite certain that most of the work of fanning grain will be wasted and that the seed will contain many weeds and other impurities.

Besides cleaning the screens frequently it is, of course, necessary to see that the grain is fed very slowly and evenly on to the screens and that the machine is also turned evenly, but fast enough to produce, as mentioned above, a strong blast of air.

All grain should be put at least twice through the fanning mill in this manner, feeding slowly each time. It is the writer's experience that the capacity of most fanning mills is estimated by the manufacturers on a basis of grain cleaning for market rather than for seed cleaning. Most machines, for instance, that are listed at 25 bushels an hour, will do a good job on seed at about eight bushels per hour only, and if more is forced through it is at the expense of good work. The machine of course must be set level and should be spliced or fastened solidly to a good stout floor and facilities should be provided to see that there is no chance scalping or screenings from either the screens or the wind becom-

## SUNDAY SCHOOL LESSON

MAY 8

ESAU SELLS HIS BIRTHRIGHT

Golden Text: "Every man that striveth in the games exerciseth self-control in all things."—1 Corinthians 9. 25.

Lesson: Genesis 25.27-34.

Devotional Reading: Hebrews 12. 14-17.

## Explanations and Comments

Isaac's Sons Contrasted, verses 27, 28.—Esau and Jacob, twin sons of Isaac and Rebekah, were wholly different in appearance and character. Esau, the first-born, was rough and hairy; he loved the outdoor life, and was a skillful hunter. He was the favorite of his father, who, as is often the case, preferred the son who was so unlike him in every way. Jacob was smooth-faced, and handsome, a quiet stay-at-home, and he was the favorite of his mother. From these statements of parental favoritism any one could foretell future trouble.

Jacob's Craftiness, verses 29-31.—One day Jacob boiled some pottage, a dish made of lentils or small beans and is to this day much liked in Syria; and when Esau came in from the field weary and faint, he asked Jacob for it. Notice that the word "pottage" in Esau's request is in italics in our text, showing that it is supplied from the context and is lacking in the Hebrew. Literally, the translation is "Feed me with the red," this red, and it strikingly shows Esau's hunger and impatient eagerness for the savory dish. Therefore was his name called Edom, we are told. Edom means "Red." Esau had red hair and complexion, and it was red pottage for which he sold his birthright: all these things combined to give him this name. He is the reputed ancestor of the Edomites.

"Sell me first thy birthright," was Jacob's answer to Esau. By the birthright he meant the rights and privileges of the firstborn which later, at least, included succession to the father as head of the family, who exercised a kind of priesthood, and a double portion of the father's property (Deuteronomy 21.17). The father's chief blessing was given to the firstborn son. It included the covenant blessing first given to Abraham—the promise of a great posterity, of the inheritance of the land of Canaan, and the special blessing of Jehovah. It was a sharp bargain that Jacob drove, taking a mean advantage of Esau in his exhaustion and hunger, but he appreciated the value of the birthright as Esau could not, for Esau cared only for the gratification of the present moment. Enjoy the present and let the future take care of itself, was his rule of life.

"Amid all the craft and duplicity of Jacob's nature, there was immense capacity for religious fervor and religious faith. He could draw aside the veil of the unseen, and weigh its promises, and compare its treasures with the shows of earth. He could dream angel-haunted dreams, that threw a mystic ladder over the abyss of space, linking all worlds. And while Esau was occupied with pleasure, Jacob could feel within him the strange stirrings of a nature which could not be satisfied with anything within the narrow limits of his tents; but which yearned for that spiritual heritage which was summed in the word 'birthright'."—F. B. Meyer.

Esau's Folly, verses 32-34.—"I am tired to death," is an expression we often hear and Esau gave utterance to the same feeling with the same amount of meaning: "Behold, I am about to die," he exclaimed, "and what profit shall the birthright do to me?" What did he care about something of use only in the distant future? All he cared for now was the satisfying of his present hunger.

"We barter life for pottage! sell true bliss  
For wealth, or power, for pleasure  
or renown!  
Thus, Esau-like, our Father's blessing miss,  
Then wash with fruitless tears  
our faded crown."—(Keble).

ing mixed with the good cleaned seed.

Fanning mills with screens only separate according to the difference in width of kernel. To separate kernels of different lengths, that is to say, wheat from oats, etc., it is necessary to use what is called an indentation machine such as a Carter Disc or an indent cylinder. The most perfect job of seed cleaning is offered by travelling or stationery plants in which the grain is first passed through a good fanning mill with a strong blast of air, then through either an indent cylinder or a Carter Disc. The average fanning mill, using screens alone will not separate wheat from oats or vice versa.

## Radio On the Desert

Camel passengers crossing the Arabian desert may listen to radio selections from radios strapped on the backs of "ships of the desert." The camels are reported from Aden as bearing up well, even though loudspeakers are being placed near wells at regular stopping places.

## "YES, I AM 40 YEARS OLD!" says Irene Rich

"YES, I am 40 years old. I don't mind confessing it a bit," says Irene Rich, "and I have two grown daughters of whom I am very proud. A screen star never worries about birthdays, you know."

But, in Hollywood, they guard complexion beauty above all else. They know it says youth quicker than anything else.

How does this lovely star guard complexion beauty? Just as so many other Hollywood actresses do—686 of the 694 important ones! "I have used Lux Toilet Soap regularly for years," she says, "and am very grateful for it."

Surely you will want to try this fragrant, white soap. The caress of dollar-a-cake French soap for 10c.!

IRENE RICH and her two daughters (left to right) Frances, twenty-one years old, Jane (in background), fifteen, their mother, actually 40! (above). One of Miss Rich's recent photographs.

## Salada Reduces Tea Prices

Salada Tea Company Makes Important Announcement

An announcement of a price reduction has just been made by Salada Tea Company of Canada, Limited, amounting to 10 cents a pound. Mr. A. M. Wilson, manager of the Company, who has been in Winnipeg for the past few days conferring with Mr. R. M. Gibson of Messrs. Gibson, Paterson, Limited, the Company's western representatives, has this comment to make on the new prices announced by his Company:

"Teas are cheaper in the primary markets in London, England; Colombo, Ceylon, and Calcutta, India, although best quality teas have not declined in price to nearly the same extent as the lower grades. Nevertheless, the Salada Company, while rigidly maintaining the quality of its product, has reduced prices twice within the last two years, so that today the consumer is paying 25 per cent. less for this well-known product than he did in 1930. The price reduction had been contemplated for several weeks, but was postponed until after the announcement of the Dominion budget proposals in the House of Commons. Tea merchants expected a further tax on tea, but, as there was no additional impost announced, they were able to make a downward revision of 10 cents on the pound, or 5 cents on the half-pound."

Four hundred plants have been found that eat insects.

## Gas in the Stomach Is Dangerous

Recommends Daily Use Of Bisurated Magnesia To Overcome Trouble Caused By Acid Indigestion

Gas in the stomach accompanied by a full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach ulcers. Food ferments and sours, creating the distressing gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead get from any druggist a little Bisurated Magnesia and take a teaspoonful or four tablets in water right after eating. This will drive the gas, wind and flat right out of the body, sweeten the stomach, neutralize the excess acid and prevent its formation and there is no sourness, gas or pain. Bisurated Magnesia (in powder or tablet form—never in liquid or milk) is harmless to the stomach, inexpensive to take and the best form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

## Report Submitted On The Milling And Baking Qualities Of Spring Wheat Varieties

A report on the milling and baking qualities of Canadian spring wheat varieties has been submitted to the commons committee on agriculture.

The report was made to the National Research Council by J. G. Malloch, assistant research biologist, University of Alberta; W. F. Geddes, professor of agricultural chemistry, University of Manitoba, and R. J. Larmour, assistant professor of chemistry, University of Saskatchewan.

A co-operative study was made of the milling and baking quality of 25 varieties of spring wheat, now grown in western Canada. Samples were grown in adjacent plots by the Dominion Experimental Farms and Universities in Manitoba, Saskatchewan and Alberta in 1928, 1929 and 1930. Only samples which were sound enough to be placed in the statutory grades by official inspectors were used.

Part of each sample was milled and baked in each of the three co-operating laboratories. Four baking formulas were used. The varieties were classified on the bases of loaf volume, texture, crumb color, general appearance of loaf, absorption and yield of straight flour. These classifications were combined to give classifications for baking quality and milling quality and finally for suitability for export and domestic milling. The last classification is briefly:

1. Varieties which are entirely satisfactory: Reward, Ceres, Marquis, Pioneer, Red Fife, Renfrew, Red Bobs 222 and Supreme.

2. Varieties which are fairly satisfactory: Early Red Fife, Ruby and Early Triumph.

3. Varieties which are unsatisfactory: (a) White wheats: Quality, Axminster and Hard Federation. (b) Varieties differing from Marquis in milling characteristics: Garnet and Kota. (c) Varieties inferior to Marquis in baking characteristics: Garnet, Parker's Selection, Brownhead, Huron, Kitchener, Preston and Marquillo.

4. Varieties which are very unsatisfactory: Early Prolific, Dicklow and Vermillion.

Of Marquis, the report states it is "our standard variety and is satisfactory in all respects."

Dealing with Reward, the report reads:

"Reward has a high weight per bushel and a satisfactory flour yield. It has a very high protein content. The baking qualities are excellent. It gives loaves of large volume with good color, texture, appearance and absorption. Reward has the best milling and baking quality of the varieties tested."

Among the varieties placed in the class unsatisfactory for export or domestic milling in the report, perhaps the most extensively grown is Garnet. The report states:

"Garnet: The test weight and the yield of flour are satisfactory. Garnet differs from Marquis in its tempering properties and cannot be tempered properly when mixed with that variety. For this reason the milling quality of Garnet is classed as fair. The protein content is low. It is satisfactory in absorption and in appearance of the loaves. The other baking characteristics are poor.

"It gives small loaves with poor texture, particularly when baked by the blend-bromate or malt-phosphate formulas. The color of the crumb is decidedly yellow. Garnet cannot be considered a desirable variety.

The report was dated on April 4.

"What a silly place to put a wash-basin!"—Sondagsnisse-Strix, Stockholm.

### Not Easy To Answer

How Can Farmer Make Money With Prices So Low

We can tell the farmer to a decimal point how many acres of sod or stubble a man should plow in a ten-hour day with a team of horses or with a tractor. We can inform him that he should be able to grow potatoes for 30 cents per bushel; likewise that the average length of life of a corn-binder is 20.6 years, and that a gang-plow should live to the fine old age of 19.3 years. Yes, sir, we can fairly spout statistics and figures which would amaze the man on the farm. But honestly, brother, when you ask how to make money selling milk to the factory at something under two cents per quart, and when you yearn for enlightenment on how to wax fat on selling pigs with their boots on at \$4.25 per hundred, we must follow our usual policy of being very frank, and our answer is that we have a sneaking suspicion that you can't do it. —Strafford Beacon-Herald.

### Work Under Handicap

Watch Is Not Used By Russian Railway Men

The lack of watches in Soviet pockets is partially blamed by the Transport Union for recent railway disasters, says a message from Moscow. Wrecks occur, trains are late, and the transportation system suffers from lack of co-ordination, when employees cannot determine whether they are operating their trains according to the time-table. The Commissariat of Transport, tried the experiment of issuing watches to men as they went on duty, and having them turned in at the close of work, so they would be available for the next shift. This proved unsatisfactory, chiefly because the watches were not given sufficient care. Now the Union has called on the Commissariat of Supply to speed up the output of watches so that all railway men may have them.

### Navigators Fear Fog

Only Danger Which Is Really Alarming To Sea Captain

Fogs are the most dangerous hazards that confront navigators. A sea captain is not greatly alarmed by a heavy gale; he doesn't worry much about a high running sea; he manoeuvres his vessel through treacherous sounds and within perilous passages without more than ordinary caution; but when a thick fog hangs over the water he immediately reduces the speed of his ship and keeps his ears open for the bellow of the foghorn that indicates the proximity of a dangerous shore or a hidden rock.

The U.S. army and navy have 12 standard sizes of flags.

### Plants Think On Seeing the Light

Scientist Says, Vegetable Kingdom Has Brains and Uses Them

When you see a plant bending toward the light, it is thinking. For plants have brains, according to experiments conducted by the Smithsonian Institution at Washington. Like human beings and animals, they also have eyes and legs—and use them.

This relation between the vegetable and animal kingdom, discovery of which may have far reaching results, was disclosed by a doctor who has made a study of the actions of plants when exposed to light.

"There appears to exist in the plant a more or less localized region capable of receiving a stimulus," he said. "It has been shown that the most sensitive portion of a coleoptile—the leaf sheath surrounding the bud of an ascending shoot—is the first fifty microns of the tip. The first millimeter is 160 times as sensitive as the second, and 1,800 times as sensitive as the third millimeter zone."

The tip of the plant corresponds to an eye. When light strikes the "eye," then the stem of the plant corresponding to the leg, bends much as a human being does in walking.

### A Really New Invention

Quebec Man Has Potato Machine That Works Successfully

The completion of a potato digging machine of his own invention has recently been announced by Joseph Morau, of Ville St. Pierre near Montreal. He claims that it has been inspected by the federal and provincial government authorities and pronounced to be the only machine in existence today that will dig potatoes without injuring the vegetable. It weighs 300 lbs., is made up of twenty component parts and can be hauled by a team of horses or by a motor truck.

### Cling To Old Idea

North Carolina Indians Still Believe In "Witch Children"

"Witch children," specially educated from babyhood to be witches, have just been reported by a scientist to exist among the Cherokee Indians of North Carolina.

These 20th century witches are "made, not born," says Dr. Frans M. Oibrechts, Belgian ethnologist, in a report issued by the Smithsonian Institution. Children, preferably twins, selected for a career as witches are put through an initiation supposed to endow them with supernatural powers.

### Oldest Official Retiring

Sir Edward Wallington, a member of the Queen's household, first as private secretary and then as treasurer since the accession of King George, is soon to retire from office. He is the oldest official in the royal household and was born in 1854. At one time he was private secretary to a succession of colonial governors, and came to be known as "Better Not" Wallington, due to his skill in heading off undesired visitors.

## Probable Carry-Over Of Wheat Is Expected To Be Smallest Since 1928, According To Estimates

### Northern Grown Seed

Herman Trelle Advises Use To Avoid Danger From Rust

Prairie farmers who face the annual menace of rust should fight by use of northern grown seed grain, declared Herman Trelle, wheat king, at Edmonton.

Reports on Peace River seed used on the southern prairie affected zones had shown practical immunity the first year, while resistance began to break down the second year. That indicates change of seed every third year would prove good insurance against rust. He believed seed grown in northern Saskatchewan would be equally as effective for Manitoba and southern prairie farmers.

Trelle dubbed the research hunt for good milling rust-resistance wheat varieties as a "wild goose chase" and waste of time and money.

### Watermark On Paper

Pulp Is Passed Under Roller Which Bears Requisite Device

A watermark is a device which is incorporated in the body of a paper. When paper is made by machinery the paper pulp is passed under a wire roller, known as the "dandy" roll, which bears the requisite watermark device. The paper is thus thinned where the wires of the "dandy" roll touch it, and so, when the paper is finished, these parts are more transparent than the rest. While a large number of postage stamps are printed on watermarked paper, it is incorrect to suppose that a specimen is not genuine because its paper is unmarked. There are many countries which do not avail themselves of this useful safeguard against the forgery of their postage stamps.

### Undue Pessimism

Canada Suffering From a National Headache, Says Hon. R. J. Manion

"We are suffering from a national headache induced by a financial debacle," said Hon. R. J. Manion, Federal Minister of Railways and Canals, in the course of an address before the Toronto Liberal-Conservative Businessmen's Club at Toronto.

"There is undue pessimism, just as there was undue optimism in the boom days of 1929," he said. "Let us practice some of the spirit showing during the war, and we will be one of the first countries to return to prosperity."

### Japs Issue Warning

A warning to the League of Nations and to Soviet Russia to keep "hands off Manchuria" was issued by General Sadao Araki, Japanese war minister, in a speech to the Kokuhonsha, a patriotic society of Osaka.

A survey of the world wheat situation shows varying conditions, but the bright spot for Canada is the estimate of a comparatively small carry-over, with indications of favorable export trade for the balance of the present crop year, ending July 31, 1932.

Recent estimates place the probable carry-over at 104,000,000 bushels, the smallest since 1928, and about 30,000,000 bushels less than on July 31, 1931.

In a review of world conditions, issued by the Dominion Bureau of Statistics, the European market is described as "broader today than at any time during the present crop year." World import requirements for the balance of the crop year are placed at from 225,000,000 to 235,000,000 bushels. Under present conditions, Canada and the United States will be called on to supply 150,000,000 bushels, probably, says the bureau review, about 75,000,000 from each country.

Reports of below normal conditions in the winter wheat belt of the United States have focused the eyes of the grain trade on the situation there. With early reports of a crop 42 per cent. below the 1931 yield, weather conditions over that production area in the next few weeks will have an important effect upon the world situation.

Growing crops in Europe are subject of varying reports, but it is too early, adds the review, to offer definite comments. In general, crops in northern Europe are inclined to be backward, and in central Europe, including France, Spain and Germany, are in good condition. The Danubian countries report favorable development, with the exception of Hungary, where wheat and rye crops are unsatisfactory. Reports from Russia continue to indicate difficulty in getting the 1932 production underway and the Soviet continues to offer a field for speculation among students of the wheat situation.

### Dentists Require More Than Mechanical Skill

Students Now Get Good Grounding In Medical Science

No profession offers better possibilities in the province of Quebec than the dental profession, Dr. Walsh, acting dean of the Dental Faculty of McGill University, told members of the Gyo Club at Montreal. There was only one dentist for every 3,300 persons he pointed out.

Up to the present time, Dr. Walsh thought, the dental profession had been looked upon as merely a highly-skilled mechanical one. All this was changing, however, and it was generally recognized now that students of dentistry were getting every bit as good as the medical students. He prophesied that the time was close at hand when people would not merely ask the dentist what was wrong with this or that tooth, but ply him with the question: "Is anything wrong with my mouth?"

### Owe Much To Grenfell

It is forty years since Sir Wilfred Grenfell went to the Labrador and set about helping the distressed natives. Now, thanks to him, the coast has five hospitals, seven nursing stations, two schools, co-operative stores, orphanages, trading centres, and children's homes.

"I came here because I am a bachelor and love war."

"I came here because I am married and love peace."—Buen Humor, Madrid.

## Inglorious End of Glorious Flight

Workmen are shown hauling the wreckage of the plane in which J. A. Mollison (inset), English aviator, made a record-breaking flight from England to Africa, from the Milnerton Beach, Cape Town, South Africa. The airman crashed on the completion of his long flight while attempting to make a landing on the beach. He flew from London, England, to the tip of Africa in just five days. Mollison was uninjured in the crash and immediately drove to the aerodrome, where thousands of anxious spectators greeted him.

## Reduce the Acid

**S**ICK stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated.

Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless dose neutralizes many times its volume in acid. For 50 years the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go, prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians in correcting excess acids.

## THE HOUSE OF DREAMS-COME-TRUE

MARGARET FIEDLER

Author of  
"The Splendid Folly," "The Hermit  
Of Far End,"  
Hodder & Stoughton, Ltd., London.

### CHAPTER XX.

#### The Shadow Of The Future

Gold of gorse and purple of heather, a shimmering haze of heat quivering above the undulating green of the Moor, and somewhere, high up in the cloud-flecked blue above, the exultant, piercingly sweet carol of a lark.

"Oh! How utterly perfect this is!" sighed Jean.

She was lying at full length on the springy turf, her chin cupped in her hands, her elbows denting little cosy hollows of darkness in the close mesh of green moss.

Tormarin, equally prone, was beside her, his eyes absorbing, not the open vista of rolling moor, hummocked with jagged tors of brown-grey stone, but the sun as it rioted through a glory of red-brown hair and touched changeable gleams of gold into topaz eyes.

There was a queer little throb in Jean's voice, the low note of almost passionate delight which sheer beauty never failed to draw from her. It plucked at the chords of memory, and Tormarin's thoughts leaped back suddenly to that day they had spent together in the mountains, when, as they emerged from the pinewood's gloom to the revelation of the great white-pinnacled Alps, she had turned to him with the rapt cry: "It's so beautiful that it makes one's heart ache!"

"Do you remember—" he began involuntarily, then checked himself. "M-m?" she queried. The little interrogative murmur was tantalising in its soft note of intimacy.

The Jean of the last few days—the days immediately following their quarrel—had temporarily vanished. The beauty of the Moor had taken hold of her, and all the mockery and bitter-sweetness which she had latterly reserved for Tormarin's benefit was absent from her manner. She was just her natural sweet and wholesome self.

"M-m? Do I remember—what?"

"I was thinking what a pagan little

beauty-lover you are! You worshipped the Alps. Now you are worshipping Dartmoor."

She nodded.

"I don't see why you should call it 'pagan,' though. I should say it was equally Christian. I think we were meant to love beauty. Otherwise there wouldn't have been such a lot of it about. God didn't put it around just by accident."

"Quite probably you're right," agreed Blaise. "In which case you must be"—he smiled—"an excellent Christian."

"Positively I believe they're talking theology!"

Claire's voice, girlishly gay and free from the nervous restraint which normally dulled its cadence of youth, broke suddenly on their ears, as she and Nick, rounding the corner of a big granite boulder, discovered the two recumbent forms.

"You disgustingly lazy people!" she pursued indignantly. "Everybody's dashing wildly to and fro unpacking the lunch baskets, while you two are just lounging here in blissful idleness!"

"It's chronic with me," murmured Tormarin lazily. "And anyway, Claire, neither you nor Nick appear to be precisely overtaxing yourselves bearing nectar and ambrosia."

"I carried some of the drinks up this confounded hill," submitted Nick. "And damned heavy they were, too! I can't think"—plaintively—"why people should be so thirsty at a picnic. I'm sure Baines has shoved in enough liquid refreshment to float a ship."

"Praise be!" interpolated Blaise piously.

"Oh, we've done our share," supplemented Claire. "And now we're going to the gipsy who lives here to have our fortunes told."

"Before lunch," subjoined Nick. "So that in case they're depressingly bad you can stay us with flagons afterwards."

Jean sat up suddenly, her face alight with interest.

"Do you mean that there is a real gipsy who tells real fortunes?" she demanded.

"Yes—quite real. She's supposed to be extraordinarily good," replied Nick. "She is a lady of property, too, since she has acquired a few square yards of the Moor from the Duchy and built herself a little shanty there. She rejoices in the name of Keturah Stanley."

"I should like to have my fortune told," murmured Jean meditatively.

"I'll take you," volunteered Blaise. There was a suddenly alert look in his face, as though he, too, would like to hear Jean's fortune told.

"We'll all go, then," said Claire. "You must let Keturah tell yours as well, Blaise."

He shook his head.

"Thanks, no," he answered briefly. "I know my fortune quite as well as I have any wish to."

Tormarin's curt refusal somewhat quenched the gaiety of the moment, and rather soberly they all four made their way down the slope to where, in a little sheltered hollow at the foot of the tor, the sunlight glinted on the corrugated iron roofing of a tiny two-roomed hut, built of wood.

Outside, sitting on an inverted pail and composedly puffing away at a clay pipe, they discovered a small shrivelled old woman, sunning herself, like a cat, in the midday warmth.

She lifted her head as they approached, revealing an immensely old, delicately-featured face, which might have been carved out of yellow ivory. It was a network of wrinkles, colourless save for the piercing black eyes that sparkled beneath arched black brows, while the fine-cut nostrils and beautifully moulded mouth spoke unmistakably of race—of the old untainted blood which in some gipsy families has run clear, unmixed and undiluted, through countless generations.

There was an odd dignity about the

## "No repairs in 22 years," says home owner

"Visitors are delighted with the noiseless operation of my doors," says a home owner of Monongah, West Virginia. "The locks and hinges have been in active service 22 years, and during this time I haven't spent a cent for repairs. I've never used anything but 3-in-One Oil."

Many housewives who pride themselves on the spotless appearance of their homes are careless about the lubrication of hinges and locks. Try a few drops of 3-in-One Oil today and see how quickly it brings out rust, dirt and squeaks. For 3-in-One, a blend of animal, mineral and vegetable oils, is distinctly different from ordinary oil; it cleans and protects as well as lubricates.

For 35 years 3-in-One has been recognized as the best oil for sewing machines, vacuum cleaners, lawn mowers, hinges and general household lubrication. Insist on 3-in-One Oil. At good stores everywhere. For your protection look for the trade mark "3-in-One" printed in Red on every package.

shrunken, still upright figure as she rose from her seat—the freedom of one whose neck has never bowed to the yoke of established custom, whose kingdom is the sun and sea and earth and air as God gave them to Adam—and when the visitors had explained their errand, and she proceeded to answer them in the soft, slurred accents of the Devon dialect, the illiterate speech seemed to convey a strange sense of unfitness.

Claire and Nick were the first to dare the oracle. The old woman beckoned to them to follow her into the cottage, while Tormarin and Jean waited outside, and when they emerged once more, both were laughing, their faces eager and half excited like the faces of children promised some indefinite treat.

"She's given you luck, then?" asked Jean, smiling in sympathy.

The gipsy interposed quickly.

"Tez'n't for me to give nor take away the luck. But I know that, back o' they gert black clouds the young lady's so mortal feared of, the zun's shinin' butivul. I tell 'ee, me dear!"—nodding encouragingly to Claire, while her keen old eyes narrowed to mere pin-points of light—"you'll see it, yourself—and afore another year's crep' by. 'Ess, fay! You'll know then as I telled 'ee trew."

Then, with a sudden gesture that summoned Jean to follow her, she disappeared once more into the interior of the hut.

Jean hesitated nervously in the doorway. For a moment she was conscious of an acute feeling of distaste for the impending interview—a dread of what this woman, whose eyes seemed the only live thing in her old, old face, might have to tell her.

"Come with me," she appealed to Blaise. And he nodded and followed her across the threshold.

The scent of a peat fire came warm and fragrant to her nostrils as she stepped out of the sunlight into the comparative dusk of the little shanty, mingling curiously with an aroma of savoury stew which issued from a black pot hung above the fire, bubbling and chuckling as it simmered.

The gipsy, as though by force of habit, gave a stir to its contents and then, settling herself on a three-legged stool, she took Jean's hand in her wrinkled, claw-like fingers and peered at its palm in silence.

"Your way baint so plain tu zee as t'other young lady's," she muttered at last, in an odd, sing-song tone. "There's life an' death an' fire an' flame afore yu zee the sun shinin' clear. . . . And if so be yu take the wrong turnin', you'll niver zee it. And there'll be no postes to guide 'ee. Tez yur awn sawl must tell 'ee how to walk through the darkness. For there's darkness comin' . . . black darkness."

(To Be Continued.)

### Good Reason For Economy

A bond salesman went into a drug store the other day and ordered a plate of crackers and a glass of water. A friend who happened to be in the same store, asked him: "What's the matter, Mac? On a diet?"

"No," snapped the other. "On commission."

Nearly 400 types of cheese are produced in the United States.

Paris is opening many new schools.

W. N. U. 1940

### Inventors Keep Busy

#### Automatic Oyster Opener Prize Of This Year's Exhibition

Double-action fly swatter—non-skidable soap—bell-ringing fishing rods—toothpaste tube collapsers—automatic oyster openers—adjustable baby feeders.

These are among the 5,000 inventions arriving at Grand Central Palace for the fourth international patent exposition.

The new fly-swatter operates with a scissors movement and eliminates the possibility of spots on walls or furnishings.

The soap turns out to be a sponge-rubber mitten with a ventilated palm in which liquid is enclosed. The suds force their way through. The toothpaste tube collapser is two rollers turned by a small crank and forces out every last drop of the paste.

One fishing rod has a bell attached and can be stuck in the ground while the angler drowns. When the fish bites the bell rings.

The automatic oyster opener is really the prize of the show. Its inventor is Oscar Abbatte, of Baltimore, Md. The device is operated by means of a crank which forces a flat, spear-shaped knife between the shells of the oyster, opening 25 a minute.

The baby feeder is merely an adjustable bottle which can be attached to the crib and never eludes the reach of the occupant.

Nights Of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

### Britain's Youthful Peers

#### Thirty-Two Are Not Old Enough For House Of Lords

Britain has 32 peers who cannot take their seats in the House of Lords because they are not of age. Many bearers of old titles are still playing with their blocks, among them being Lord Wrexhall, three, and Lord Montagu, of Beaulieu, five. Lord Gainsborough is eight, Lord Haig, son of the late British Commander, is 13. The Earl of Shrewsbury and Talbot, who is premier earl in the peerages of both Lord England and Scotland, is 17, as is Lord Gormanston, premier viscount of Scotland.

## ACIDITY FOR 10 YEARS Before he Found the Remedy

Many people endure suffering unnecessarily. This man did. If he had known ten years ago what he knows to-day, he would have been spared a great deal of suffering.

"I feel I must write a few lines in appreciation of your Kruschen Salts. I have suffered for 10 years from chronic acidity of the stomach. I tried nearly everything, until I was advised by a friend to try Kruschen, which I have taken for the last two months, and I am pleased to say I have had no return of the acidity."—W. H.

Kruschen Salts swiftly neutralizes acid, takes all the torment out of it, and gently expels it from the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this harmful acid from ever accumulating again. After that you'll experience no more misery after meals. Kruschen will keep your inside clean and serene. Pure and invigorated blood will be sent coursing to every part of your body. You'll feel wonderfully energetic and well. As healthy and hearty as it is humanly possible to feel.

### Little Helps For This Week

"Thou hast put gladness in my heart."—Psalm iv, 7.

Cheerfulness

Doth expresse

A settled, pious mynde,  
Which is not prone to grudging,  
From murmuring refined.

—Anne Collins.

What indeed does not that word cheerfulness imply? It means a contented spirit; it means a pure heart; it means a kind loving disposition; it means humility and charity; it means a generous appreciation of others, and a modest opinion of self. —William Makepeace Thackeray.

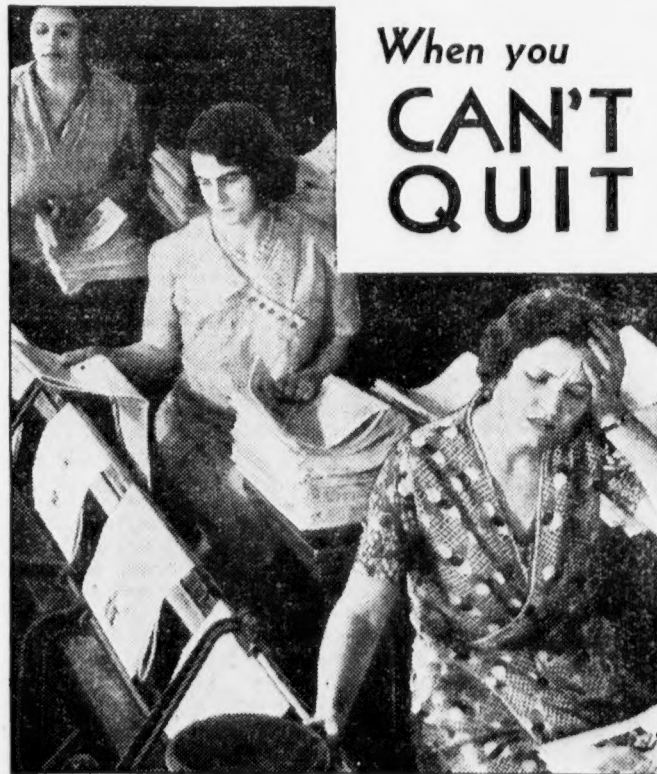

It is a Dutch proverb that "paint costs nothing," such are its preserving qualities in damp climates. Well, sunshine costs less, yet is finer pigment; and so of cheerfulness, the more it is spent, the more of it remains. —Ralph Waldo Emerson.

Persian Balm—Invaluable to the whole family. To the mother, a flawless aid to loveliness. To the child a soothing, healing balm. And to the father, a splendid hair fixative and cooling shaving lotion. Persian Balm tones and refreshes the skin. Makes hands delightfully soft and white. Indispensable to dainty women. A little gentle rubbing and it is absorbed by the tissues, making the skin truly rose-leaf in texture.

She—Why did the land agent speak of that property as a parcel?

He—Because it is tied up, I suppose.

## When you CAN'T QUIT

**A** HEADACHE is often the sign of fatigue. When temples throb it's time to rest. If you can't stop work, you can stop the pain. Aspirin will do it, every time. Take two or three tablets, a swallow of water, and carry-on—in perfect comfort.

Don't work with nerves on edge or try all day to forget some nagging pain that Aspirin will end in a jiffy! Aspirin can do you no harm; just be sure that it is Aspirin with Bayer on each tablet.

In every package you'll find proven directions for headaches,

colds and sore throat; neuralgia, neuritis, etc. Carry these tablets with you, and be prepared. To block a sudden cold on the street-car; quiet a grumbling tooth at the office; relieve a headache in the theatre; spare you a sleepless night when nerves are "jumping."

And no modern girl needs "time out" for the time of month! Your little box of Aspirin tablets is sure relief for all such pain.

Take Aspirin for any ache or pain, and take enough to end it. It can't harm you. At drug stores everywhere. Made in Canada.

## Nerves A Complete Wreck Sat Up Half The Night

Mrs. John Rose, Bark Lake, Ont., writes:—"I was troubled so much with my nerves I was a complete wreck."

I could not do my work, and would have to sit up half the night on account of not being able to sleep.

One day a friend recommended Milburn's Heart and Nerve Pills. I used one box and got relief, and by the time I had taken six boxes I was as well as ever."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

dead; the citizens are dead—Sleepy  
Hollow is setting in. At least this is  
beginning to seem so, for what are we  
doing to advertise our town to the out-  
side world and surrounding settle-  
ments. Our organizations are selfish—  
which includes tennis and golf in the  
line of summer sports. These clubs are  
all for their members—but nothing for  
the individuals who do not follow the  
sport. And what is the remedy? A real  
old fashioned Sports Day, of course.  
Something that will bring town and  
country people together—and a few  
outsiders besides. Community effort is  
needed to put it over, but that is all.  
Other towns are doing it and success-  
ful sports days are being held in spite  
of adverse conditions. Hard Times are  
no reason for holding back—they are  
every reason for co-operation and ad-  
vancement, at the same time giving  
us something to think about besides  
our debts and the government's pre-  
dicament.Let's give this sports day serious  
consideration! The summer season is  
just starting. We have four months  
to put it across. And we can do it.**STREET LIGHTS**Conditions change as years roll by.  
They have changed in Carbon with the  
mine settlement switching from the  
East to the west of Carbon. And the  
Village must correspond with the new  
changes and act accordingly. One mat-  
ter is street lighting. The Village is  
allowed, and pays for so many lights.  
Financial stringency forbids the ad-  
dition of new lights, and the south-  
west end of town is not well lighted  
in view of the fact that most of our  
night traffic will now be to and from  
the mines. Some lights will have to  
be changed unless new ones are added.  
One instance where there is almost a  
duplication of lights is on the street  
running from the corner of Dr. Mc-  
Farlane's residence to the post office.  
On this street there is a light midway  
between the two corners. It should be  
moved where it would be of better ad-  
vantage, especially in view of the fact  
that the Garret Motors is well lighted  
and furnishes illumination at that part  
of the town. Residents on this street  
will have every right to complain, af-  
ter having the light so long, but they  
should consider others, and at this time  
the miners and their families, who  
will visit town more often should their  
path be lighted.**And the
